

# RASİM TUĞBERK İNCİ

SOFTWARE ENGINEER

## ABOUT ME

Hello,  
I am Rasim Tuğberk İnci. I was born in 1995 in Turkey. I completed my bachelor degree at **Konya Technical University as a computer engineer**. When I was a student at the university, I wrote in the .Net field for a while. I passed the exams of the institution named **Patika.dev** and received training on **.Net Core and Rest Api** fields. I worked as a software engineer in the fields of **e-commerce, educational technologies and finance**. I am the **co-founder of the Edu Jou team**, which was a semi-finalist in the entrepreneurship program called **TÜSİAD BGİV**. Within the scope of this program, I received entrepreneurship training from the TÜSİAD institution. Sketching and swimming are my biggest hobbies. You can also check out my personal website **rti.com.tr** and my blog site **objectsetnull.com**.

## JOB EXPERIENCE

### Software Team Lead | RyseSoft Inc.

October 2022 - Current

- I have been working as a backend .Net Core software developer and software team lead at RyseSoft company. During at this time, I have been using technologies such as **.Net Core, Rest Api, Asp.Net Core MVC, React, Bootstrap** and **Tailwind** during this time.

### Software Developer | Rysesoft Inc.

July 2022 - October 2022

### Software Developer | Gri Internet Technologies Inc.

December 2021 - April 2022

- I worked as a back-end .Net Core software developer within the scope of the Gri company which operates in the **e-commerce** and **hosting** sectors.

### Intern Engineer | Mavinci Informatics Industry and Trade Inc.

July 2021 - August 2021

- I worked as an intern engineer in the project called spectra, which is used by the Coca-cola company on the B2B side in Turkey which had been developed with **ASP.NET MVC**.

### Intern Engineer | Atiker Software

July 2020 - August 2020

- I worked at Atiker Yazılım as an intern software engineer for my summer internship. During my internship, I developed a front-end project focused on **Javascript, HTML** and **CSS**.

## LANGUAGE

English | B1  
Turkish | Native

## EDUCATION

### Konya Technical University | Computer Engineering

2014-2021 GPA: 2.85/4.00

## SKILLS AND PROJECTS

### C# / .Net Core

- During my time at RyseSoft, I worked as a software developer and software team leader in **.Net Core REST API** and **.Net Core MVC** projects. I took part in the integration and development of **SOAP** and **REST** services for **payment and billing** processes. You can reach these projects at <https://services.unvanakademi.com/swagger/index.html> and <https://unvanakademi.com/>. While working at Gri Inc., I developed and completed a **.Net Core REST API** project, which is used for sending notifications via sms, where **Basic** and **JWT authentication** types can be used. In the projects I developed, I used **Entity Framework** ORM technology with **MySQL** and **MsSql** databases, but I made developments with **Entity Framework** and **Dapper** ORM technologies. I completed my internship at Mavinci on a project developed with **Asp.Net Framework MVC** and during this internship I learned the **MVC** pattern. During my undergraduate education, **I wrote a blog about the C#** language for a while on the site called TeknoKafe.Net. You can reach my other projects with my Github account.

### T-SQL / PL-SQL

- As part of the projects I developed and managed at the Rysesoft company, I launched **MsSql** databases from scratch. During my internship, I used structures such as **Store Procedure** and **Function** with small additions to the test database. At the same time, I used the **MsSql** database in some of my API projects that I developed on Github. On the **MySQL** side I have been launched a **MySQL** database during work for Gri company including structures such as **Trigger, Event, Function**. In addition, **I have been used MySQL database within my own IOT project**. At the same time I have been used **PostgreSQL** for my GitHub projects

### JavaScript

- I tried to improve myself in this field with the courses I took on Udemey and took part in the <https://panel.unvanakademi.com/> project developed with **React**. At the same time, I made developments in **.Net Core MVC** projects with **JQuery**.

### Python

- I have been developed small scale projects on the field of **TCP** and **socket** programming. In addition I have been developed some **image processing project with OpenCv** library with this programming language.

### Matlab

- As part of my graduation project, I developed a project based on the **detection of diabetic retinopathy disease with deep learning and artificial intelligence techniques**.
